

What Parents and Professionals Have Shared

"My sister-in-law suffered infant loss and it was a tragic and eye-opening experience. Working in healthcare, I never realized what a gap in support that exists for families of infant loss."

– Pam, Healthcare Administrator

"The time and memories this cradle provides are so important for grieving families. The Caring Cradle allows families who thought they would spend a lifetime with their loved baby, time to say goodbye and create memories in a respectable way. It truly is an immeasurable gift."

– Brittany Martin
President
The Jaxon Kade Foundation, Inc

"In the event of a stillbirth, those hours are often fraught with labor and delivery complications and medication side effects. The Caring Cradle gives parents time right away. Creating memories where there are none. Giving families the gift of time. Time they will never get back after it is gone."

– Catie MacDonald
Communications Director
The Jaxon Kade Foundation, Inc

Caring
Cradle

when a little more time means a lot

Removable mattress swaddles the baby, helping to cool while cuddling.

Simple operation. Plug in and ready to use in 30 minutes.

Hospital grade cord equipped with U.S. 3-pin, grounded power cord.

Designed, engineered, & assembled in the U.S.A.

Caring Cradle

The Caring Cradle is a device that offers a more dignified, comfortable way for parents and families to spend time with their baby immediately following infant loss. By cooling the precious body of a baby, the natural changes that occur in death are slowed. This allows parents memory making time; out of town family to arrive; pictures to be taken; and above all the ability to hold, rock, bathe, and cuddle the baby without worry or rush.

No staff monitoring required. No water, chemicals, or servicing required.

No alarms to startle the family during their private time.

Constructed for easy sanitation using hospital-grade cleaners.

No consumables required everything included.
